## WIRES-X PC Software Update Information

The latest versions are listed below with the release dates.

- Version 1.220 (08/08/17)

### Ver. 1.220

- Corrected situation that disconnected WIRES-X node stations when receiving a signal from a new function DG-ID compliant transceiver.
- Corrected an open error file problem that images cannot be read by the QSL image function setting of nodes and rooms.
- Corrected the node information display section of the digital mobile station and improved information on the popup screen when connecting the room.
- Corrected the reconnect/error response (transmission) is repeated when the line goes off during automatic connection. (Reconnect when it goes online)
- Implemented countermeasures so communications will be uninterrupted when using low-speed lines.
- Improved and optimized.

If you already have ver. 1.220 software, it is not necessary to update again.

We hope this new software will increase your enjoyment of WIRES-X. Thank you for choosing Yaesu radios. If you have any problems or questions please contact Yaesu Amateur Tech Support [amateurtech@yaesu.com](mailto:amateurtech@yaesu.com).
